

## Technical Datasheet

### MERSOFT LC30

**Mersoft LC30** is a concentrated lecithin to produce leathers with a silky like touch. It makes leather soft.

#### Properties

Appearance	Brown liquid oil
Chemical base	Lecithin
Ionic character	Weakly anionic
Active Substance	30 +/- 2.0 %
pH (1:10)	5.4 - 7.4

**Mersoft LC30** is soluble in cold and warm water. It is stable to hard water and electrolytes. It has good lightfastness and heat yellowing resistance and is suitable for white leathers or leathers with a pastel shade.

#### Application

**Mersoft LC30** can be used to make blends with other anionic or non-ionic fatliquors and emulsifiers. Mersoft LC30 is recommended for use in production of softer leather types like gloving leather and garment leather. The surface will have a nice silky handle. Also shoe upper leather or bag leather can be produced using Mersoft LC30.

#### Packing

**Mersoft LC30** is supplied as powder in 140 kg plastic open top drums or in 950kg net IBC's.

#### Handling

For safe handling we refer to our MSDS. Store in original closed packing between 5 and 35°C.
