

Technical Datasheet

MERSOFT VO, liq

Mersoft VO, liq is a vegetable based fatliquor for most leather types

Characteristics

Appearance	Pale yellow liquid
Chemical nature	Sulphited vegetable oil
Active Matter	Approximately 65%
Ionic charge	Anionic
pH (10% sol.)	7.5-8.0

Properties

Mersoft VO, liq has the ability to give leather very good softness. It penetrates well into the leather, and can be applied in the production of upper leathers. It is also well suitable for the production of softer leather types like garment, gloving and other light leather types.

Application

Mersoft VO, liq can be applied alone or be mixed with other anionic fatliquors. Typical application quantities vary between 3% to 5% based on shaved weight (wet blue weight). Mersoft VO, liq needs to be emulsified with hot water (50-60°C) prior to addition to the drum. If it is combined with other fatliquors, it's advised to mix the fatliquors first, and emulsify thereafter.
