

Technical Datasheet

MERTAN CS, powder

Mertan CS, powder is a chrome syntan for the retannage

Characteristics

Appearance	Greenish powder
Chemical nature	Chrome and synthetic tannins
Active Matter	Approximately 95%
Ionic charge	Weakly anionic
pH (10% sol.)	± 2.5

Properties

Mertan CS, powder is chrome syntan for the retannage of all leather types. Mertan CS, powder is usually applied before the neutralization. It has relatively low astringency, and will keep the grain of leather fine and tight. Mertan CS, powder promotes softness and improves distribution of following chemicals. It has buffering properties, and will therefore avoid pH jumps. It can be applied in the production of upper, upholstery, clothing or any other kind, also as suede and nubuck.

Application

Mertan CS, powder is usually applied before the neutralization. Applied quantities vary between 2 and 6%, based on shaved weight. Mertan CS, powder can be added to the drum in powder form.
